

I found 3 omissions in the Kiss schematics in the English Manual.

On Kiss "Plug Connectors" W1187-10 schematic MPU J2 pin 2 to playfield should have the wire color labeled "93" for a gray wire with a yellow trace.

On Kiss "Plug Connectors" W1187-10 schematic Transformer J1 to playfield should have pin 9 added with a "20" for wire color (blue) and should be labeled "SW. ILL. BUSS", the same as J1 pin 7.

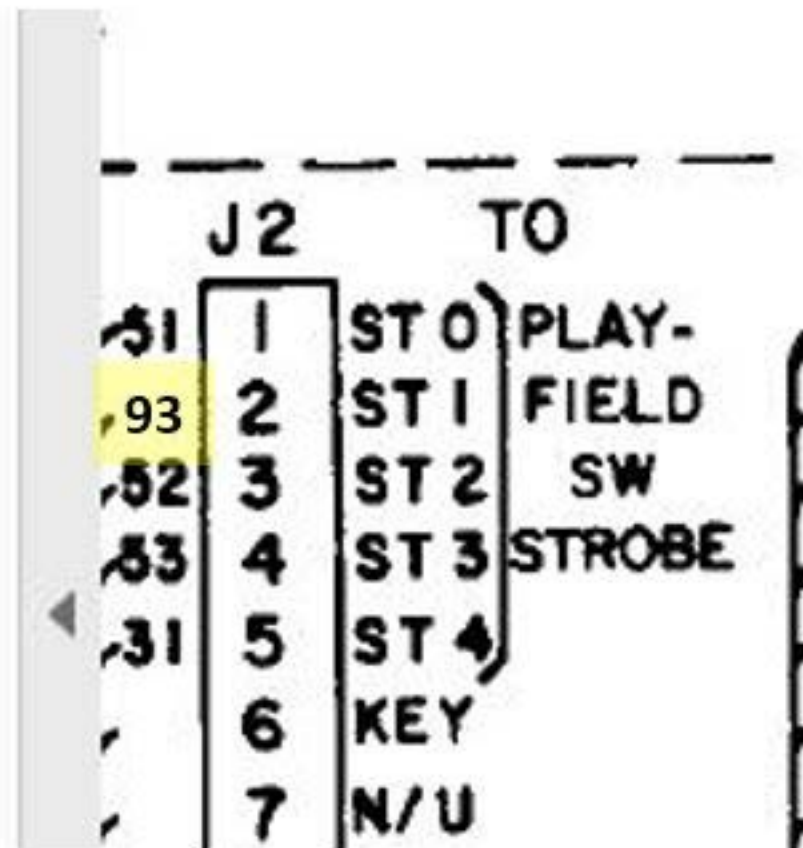

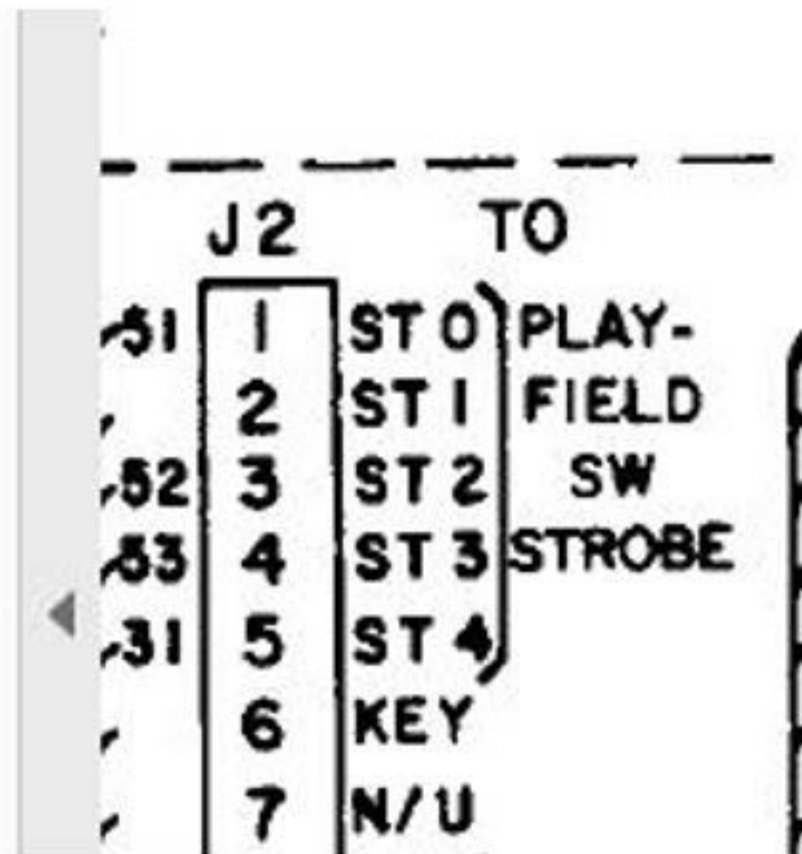

On Kiss "Switch Matrix" W1192-10 Schematic beneath the line "20----A2J1-7 Feature Lamp Buss" should be another line reading "20----A2J1-9 Feature Lamp Buss".

I have included 3 images with the additions highlighted in yellow. The only way I could upload the pictures was to use the Edit/Add Images button.

Kiss "Plug Connectors" W1187-10 Schematic

MPU J2 As Is:

Should Be Added:

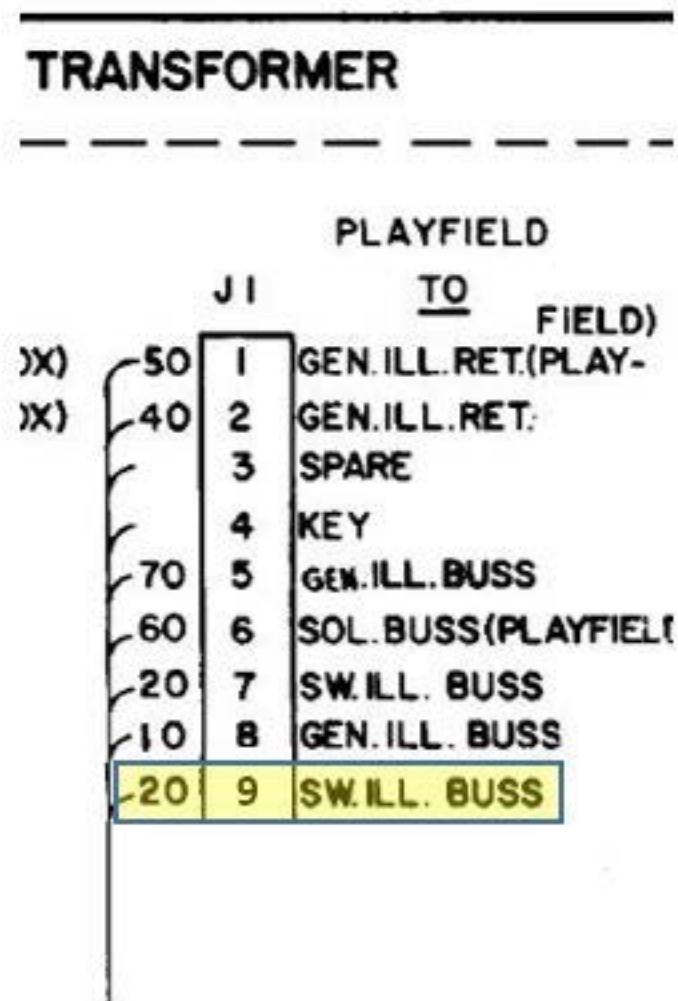

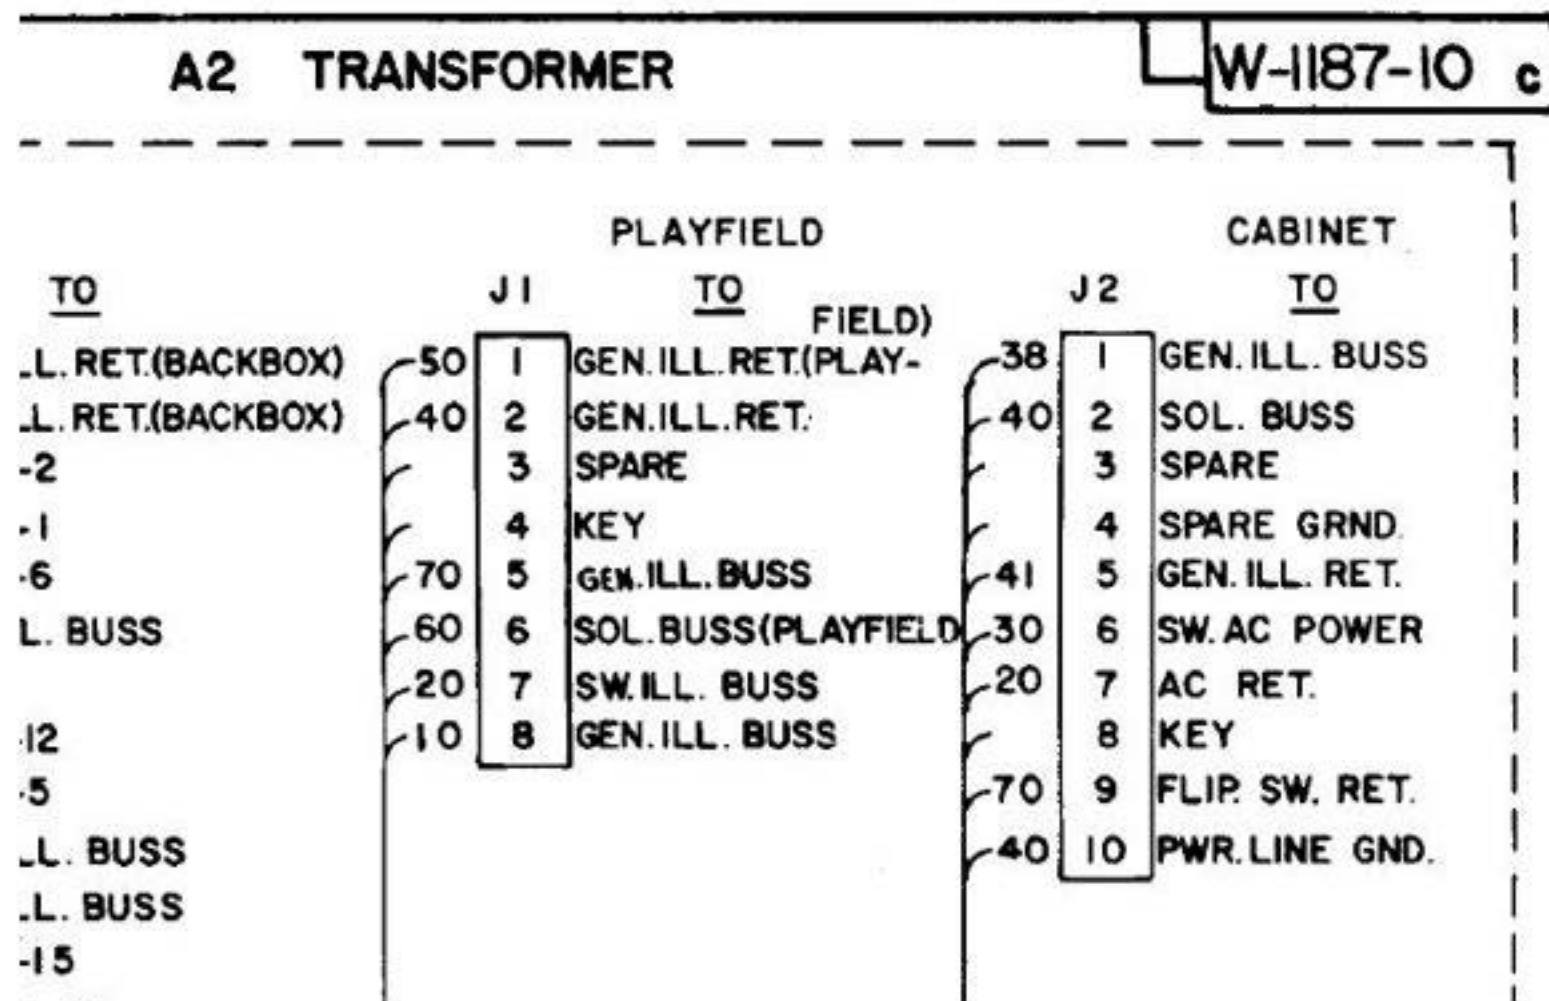

ST1 is a gray wire with a yellow trace.

Kiss "Plug Connectors" W1187-10 Schematic
