IMPORTANT!

Whip Springs have been positioned at the factory with precision gauges to insure best play-action and should not be changed—unless experience on location, after several weeks of play, indicates that a change is required by conditions in a particular location. Operator will enjoy best results by keeping Whip Springs in factory-set position.

IMPORTANT!

Factory adjustments on this game are average—for average play conditions. Naturally there are slight differences in each game and differences in players and conditions on location. Therefore, adjustments should be changed, if necessary, after game has been in operation a few days. Adjustment instructions are furnished with game. Proper adjustments will result in greatly increased earnings.
